Juniper Berries, by distillation, to form a
fine gin. Cubebs extracted by displacement with spirits obtained from Juniper
Berries; very little sugar is used, and a
small proportion of spirit. It is more palatable than any now in use.

Buchu as prepared by Druggists, is of a
durk color. It is a plant that entits its fragrance; the action of a finne desiroys this
(its active principle) leaving a dark and
glutinous decoction. Mine is the color of
ingredients. The Buchu in my preparation
predominates; the smallest quantity of the
other ingredients are added, to prisent formentation; unon inspection it will be found
not to be a Tincture, as made in Pharmacoposa, nor issit a Syrup—sand therefore can
be used in cases where lever or inflaumation exists. In this, you have the knowledge of the ingredients and the mode of
preparation.

HELMBOLD'S Fluid Extract BUCKE

With a feeling of profound confidence, I am, very respectfully,

II. T. HELMBOLD, Chemist and Drugs ist of 19 years experience,

(From the largest Manufacturing Chemists in the World.)

"I am acquainted with Mr. H. T. Helm-bold; he occupied the Drug Stars opposite my residence, and was successful in con-ducting the business where others had not been equally so before him. I have been favorably impressed with his character and enterprise."

Firm of Powers and Weightman Manufac-turing Cheenists, Ninth and Brown Streets, Philadelphia,

Hoofland's German Bitters Hoofland's German Bitters is entirely vegetable, and contains no liquor. It is a compound of Fluid Extracts. The Hoots, Herbs, and Barks from which these extracts are made are gathered in Germany. All the medicinal virtues are then forwarded to this country to be used expressly for the manufacture of these Bitters. There is no alcoholic substance of any kind used in compounding the Bitters, hence it is the only Bitters that can be used in cases where alcoholic stimulants are not advisable.

Hoofland's German Tonic is a combination of all the signedicate of the litters, with runs Santa Cruz Rum, Orange, etc. It is used for the sume diagons at the Bitters, in cases where some pure alcoholic stimulus is required. You will bear in mind that these remedies are entirely different from any others advertised for the curse, of the diseases named, these being scientific preparations of medicinal extracts, while the yelers are more decections of runs in rome forms. The TONIO is decidely one of the most pleasant and agreeable remedice versification to take public. Its taste is enquisite. It is a pleasure to take it, while its bje-giving, exhibitating, and medicinal qualities have caused it to be known as the greatest of all tonics.

Large Heads.

A general idea holds ground that large heads mean large intellects, that weight of brain indicates mental strength. But this notion is a false one; one fact will disprove it. Man is inferior to some apes in the proportion which his brain bears to his body. When we come to animals the differences are very striking. A continental physiologist has been guaging the skulls of different quadrupeds and and weighing their contents. There are beasts everything in its proper place; whose instinct approaches to leaves nothing undone which reason, and we style such intel- ought to be done, and which ligent; their high instinct is circumstances permit him to not however commensurable do; keeps his designs and buswith their cerebral develop. ments. To range a tew of the commonest animals in the order of brain weight we have the following declining scales: cat, dog, rabbit, sheep, ass, pig, horse, and ex. The two last have the same weight of nerve advantageously, either buying centre in proportion to the capacity of their bodies, but they have only a sixth part of that of the first on the list; that is to say, the cat has six times as much proportion to her size as the horse has in proportion to his size. The pig has more than the horse, the sheep more than the pig. Who would have thought it? The facts almost | set | us | to | wondering whether the brain has anything to do with the intellect at all. We copy the above from an exchange. The size of the head or weight of the brain knowing that if he leaves his does not prove anything. A hogshead has a larger head han a barrel, yet that does not show that more is contained inside of it. A bar of lead is heavier than a bar of iron of the same dimensions, yet it has not near the strength, The tention enables him; balances costly diamond is far more valuable than anything else of the all his accounts current to his same size or weight.
